BUREAU OF THE CENSUS

## Acknowledgments

This report was prepared under the direction of the Agriculture and Financial Statistics Division. Many divisions contributed to the preparation: Economic Statistical Methods and Programming, Data Preparation, Administrative and Publications Services, Computer Services, Systems Support, Field, and Economic Planning and Coordination.

Members of the Census Advisory Committee on Agriculture Statistics and representatives of both public and private organizations made significant recommendations which helped establish data content.

Members of various agencies of the U.S. Department of Agriculture provided valuable advice in the planning, publicizing, and processing phases of the census, and in helping farmers and ranchers complete the report forms.

The press, farm magazines, radio and television stations, and farm organizations were most helpful in publicizing the census and encouraging cooperation of farm and ranch operators.

Special tribute is paid to the millions of farm and ranch operators who furnished the information requested. Only through their cooperation was it possible to collect and publish the data in this report.

If you have any questions concerning the statistics in this report, call:

301-763-8555 Division Chief

## TABLES

### Selected Measures of Agriculture

1. Selected Characteristics for the United States and 10 Leading States: 1992 .....	4
2. Number of Farms: 1992 and 1987 .....	6
3. Farms With Sales of \$100,000 or More: 1992 and 1987 .....	7
4. Total Cropland: 1992 and 1987 .....	8
5. Harvested Cropland: 1992 and 1987 .....	9
6. Irrigated Land: 1992 and 1987 .....	10
7. Irrigated Harvested Cropland: 1992 and 1987 .....	11
8. Total Farm Production Expenses: 1992 and 1987 .....	12
9. Expenses for Energy and Petroleum Products: 1992 and 1987 .....	13
10. Interest Expense: 1992 and 1987 .....	14
11. Expenses for Livestock and Poultry Purchased: 1992 and 1987 .....	15
12. Expenses for Feed for Livestock and Poultry: 1992 and 1987 .....	16
13. Expenses for Commercial Fertilizer: 1992 and 1987 .....	17
14. Expenses for Agricultural Chemicals: 1992 and 1987 .....	18
15. Expenses for Hired Farm Labor: 1992 and 1987 .....	19
16. Net Cash Return From Agricultural Sales: 1992 and 1987 .....	20
17. Government Payments: 1992 and 1987 .....	21
18. Government Payments and Market Value of Agricultural Products Sold: 1992 and 1987 .....	22
19. Commodity Credit Corporation Loans: 1992 and 1987 .....	23
20. Cropland Diverted Under Annual Commodity Programs: 1992 and 1987 .....	24
21. Cropland in Conservation Reserve or Wetlands Reserve Programs: 1992 .....	25
22. Estimated Market Value of All Machinery and Equipment on Place: 1992 and 1987 .....	26
23. Estimated Market Value of Land and Buildings: 1992 and 1987 .....	27

### Value of Agricultural Products Sold

24. Market Value of Agricultural Products Sold: 1992 and 1987 .....	28
25. Value of Agricultural Products Sold Directly to Individuals for Human Consumption: 1992 .....	29
26. Value of Livestock, Poultry, and Their Products Sold: 1992 and 1987 .....	30
27. Value of Poultry and Poultry Products Sold: 1992 and 1987 .....	31
28. Value of Dairy Products Sold: 1992 and 1987 .....	32
29. Value of Cattle and Calves Sold: 1992 and 1987 .....	33
30. Value of Hogs and Pigs Sold: 1992 and 1987 .....	34

	Page
31. Value of Sheep, Lambs, and Wool Sold: 1992 and 1987 .....	35
32. Value of Other Livestock and Livestock Products Sold: 1992 and 1987 .....	36
33. Value of Crops Sold, Including Nursery and Greenhouse Crops: 1992 and 1987 ..	37
34. Value of Vegetables, Sweet Corn, and Melons Sold: 1992 and 1987 .....	38
35. Value of Fruits, Nuts, and Berries Sold: 1992 and 1987 .....	39
36. Value of Nursery and Greenhouse Crops, Mushrooms, and Sod Sold: 1992 and 1987 .....	40

#### **Livestock, Poultry, and Their Products — Inventory and Sales**

37. Cattle and Calves — Inventory: 1992 and 1987 .....	41
38. Cows and Heifers That Had Calved — Inventory: 1992 and 1987 .....	42
39. Beef Cows — Inventory: 1992 and 1987 .....	43
40. Milk Cows — Inventory: 1992 and 1987 .....	44
41. Cattle and Calves Sold: 1992 and 1987 .....	45
42. Cattle Fattened on Grain and Concentrates Sold: 1992 and 1987 .....	46
43. Hogs and Pigs — Inventory: 1992 and 1987 .....	47
44. Hogs and Pigs Other Than Feeder Pigs Sold: 1992 and 1987 .....	48
45. Feeder Pigs Sold: 1992 and 1987 .....	49
46. Litters of Pigs Farrowed Between December 1 of Preceding Year and November 30 of Census Year: 1992 and 1987 .....	50
47. Sheep and Lambs — Inventory: 1992 and 1987 .....	51
48. Ewes 1 Year Old or Older — Inventory: 1992 and 1987 .....	52
49. Sheep and Lambs Sold: 1992 and 1987 .....	53
50. Horses and Ponies — Inventory: 1992 and 1987 .....	54
51. Chickens 3 Months Old or Older — Inventory: 1992 and 1987 .....	55
52. Hens and Pullets of Laying Age — Inventory: 1992 and 1987 .....	56
53. Pullets Not of Laying Age Sold: 1992 and 1987 .....	57
54. Broilers and Other Meat-Type Chickens Sold: 1992 and 1987 .....	58
55. Turkeys Sold: 1992 and 1987 .....	59

#### **Field Crops — Quantity and Acres Harvested**

56. Corn Harvested for Grain or Seed: 1992 and 1987 .....	60
57. Sorghum Harvested for Grain or Seed: 1992 and 1987 .....	62
58. Wheat Harvested for Grain: 1992 and 1987 .....	64
59. Barley Harvested for Grain: 1992 and 1987 .....	66
60. Oats Harvested for Grain: 1992 and 1987 .....	68
61. Rice Harvested: 1992 and 1987 .....	70
62. Soybeans Harvested for Beans: 1992 and 1987 .....	71
63. Peanuts Harvested for Nuts: 1992 and 1987 .....	73
64. Dry Edible Beans Harvested, Excluding Dry Limas: 1992 and 1987 .....	75
65. Cotton Harvested: 1992 and 1987 .....	77
66. Tobacco Harvested: 1992 and 1987 .....	79
67. Irish Potatoes Harvested: 1992 and 1987 .....	81
68. Sugar Beets Harvested for Sugar: 1992 and 1987 .....	83
69. Hay Harvested — Alfalfa, Other Tame, Small Grain, Wild, Grass Silage, and Green Chop: 1992 and 1987 .....	84
70. Alfalfa Hay Harvested: 1992 and 1987 .....	86
71. Tame Hay Harvested Other Than Alfalfa, Small Grain, and Wild Hay: 1992 and 1987 .....	88

#### **Vegetables Harvested for Sale — Acreage**

72. Vegetables Harvested for Sale: 1992 and 1987 .....	90
73. Snap Beans Harvested for Sale: 1992 and 1987 .....	91
74. Cucumbers and Pickles Harvested for Sale: 1992 and 1987 .....	92
75. Lettuce and Romaine Harvested for Sale: 1992 and 1987 .....	93
76. Green Peas, Excluding Green Cowpeas, Harvested for Sale: 1992 and 1987 .....	94
77. Sweet Corn Harvested for Sale: 1992 and 1987 .....	95
78. Tomatoes Harvested for Sale: 1992 and 1987 .....	96
79. Watermelons Harvested for Sale: 1992 and 1987 .....	97

**Fruits, Pecans, and Strawberries**

80. Land in Orchards: 1992 and 1987 .....	98
81. Apples: 1992 and 1987 .....	99
82. Cherries: 1992 and 1987 .....	101
83. Grapefruit: 1992 and 1987 .....	102
84. Grapes: 1992 and 1987 .....	103
85. Oranges: 1992 and 1987 .....	104
86. Peaches: 1992 and 1987 .....	105
87. Pears: 1992 and 1987 .....	107
88. Plums and Prunes: 1992 and 1987 .....	108
89. Pecans: 1992 and 1987 .....	109
90. Strawberries Harvested for Sale: 1992 and 1987 .....	111

## HISTORY

The 1992 Census of Agriculture is the 24th taken by the U.S. Department of Commerce, Bureau of the Census. The first agriculture census was taken in 1840 as part of the sixth decennial census of population. From 1840 to 1950, an agriculture census was taken as part of the decennial census. A separate mid-decade census of agriculture was conducted in 1925, 1935, and 1945. From 1954 to 1974, a census of agriculture was taken for the years ending in 4 and 9. In 1976, Congress authorized the census of agriculture to be taken for 1978 and 1982 to adjust the data reference year so that it coincided with the economic censuses covering manufacturing, mining, construction, retail trade, wholesale trade, service industries, and selected transportation activities. This adjustment in timing established the agriculture census on a 5-year cycle collecting data for years ending in 2 and 7.

## USES OF THE CENSUS

The census of agriculture is the leading source of statistics about the Nation's agricultural production and the only source of consistent, comparable data at the county, State, and national levels. Census statistics are used by Congress in developing and changing farm programs and for determining the effects of these programs. Many national and State programs are designed or allocated on the basis of census data, such as funds for extension services, research, and soil conservation projects. Private industry uses census statistics to provide a more effective production and distribution system for the agricultural community.

## AUTHORITY AND AREA COVERED

The census of agriculture is required by law under Title 13, United States Code, section 142(a) and 191, which directs that a census be taken in 1979, 1983, and in every fifth year after 1983, covering the prior year. The 1992 census includes each State, Puerto Rico, Guam, and the Virgin Islands of the United States.

## FARM DEFINITION

Since 1850, when minimum criteria defining a farm for census purposes first were established, the farm definition has been changed nine times. The current definition, first

used for the 1974 census, is any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year. The farm definition used for the outlying areas varies according to area. The report for each area includes a discussion of its farm definition.

## COMPARABILITY OF DATA

Data on acreages and inventories for 1992 and 1987 are generally comparable. Dollar figures shown for expenses and agricultural product sales are expressed in current dollars and have not been adjusted for inflation or deflation. In general, data for censuses since 1974 are not fully comparable with data for 1969 and earlier censuses due to changes in the farm definition.

## TABULAR PRESENTATION

All of the tables in this report show data and rank for the leading agricultural States and counties for selected items from the 1992 and 1987 censuses. Statistics from all places qualifying as farms in the 1992 census are included. Also, accompanying each table are data showing the cumulative percent of the U.S. total as each leading State or county is ranked.

For all tables except one, the leading States or counties were determined by the value of the agricultural resource, inventory, or production item. The State or county with the largest value for the selected item was ranked first, the State or county with the next largest value, second, and so forth.

Tables on all crop items except fruits and pecans harvested present the number of acres harvested along with the primary quantity of the harvested item, which determines the rank of State or county. The acres for fruits and pecans are total acres in the crop. The leading counties for the primary item are often not the same for the acres harvested, or acres in crop for fruits or pecans.

Comparative data and rank for the 1987 census are shown for the leading 1992 States and counties in most of the tables presented. Depending on the specified item ranked, the 1987 data and rank may be very similar to 1992.

Total lines for the leading States and counties show the sums of the data items for the States and counties listed. The crop tables show rank for both quantity harvested and acres harvested or acres in crop for fruits and pecans. In these tables the primary ranking of the States and counties is by quantity harvested. The related ranking of the acres harvested is also shown.

## **SPECIAL TABULATIONS**

Custom designed tabulations can be developed to individual user specifications on a programming cost reimbursable basis. Inquiries about special tabulations should be directed to the Chief, Agriculture and Financial Statistics Division, Bureau of the Census, Washington, DC 20233.

## **QUALIFICATIONS OF DATA AND RANKINGS**

Data for the leading agricultural States and counties usually indicate agricultural areas of commercial importance. The leading counties usually account for a significant part of the U.S. total as shown by the cumulative statistics in each table. For certain specialty crops and fruits grown in a few areas, the leading counties account for nearly all the production. For other more widespread items such as alfalfa hay and cattle and calves on farms, the leading counties account for a smaller proportion of the U.S. totals.

It is important to note that the rank of counties is based only on data for the census year. Unusual weather or economic conditions during 1992 may have had a significant effect on the ranking of counties for certain items in certain areas. A ranking of counties based on the average of data for several years would undoubtedly show a number of differences in the rankings.

Occasionally the ranking of a county may be influenced by the assignment of all land, agricultural operations, and sales of farms with land in two or more counties to the county with the largest value of agricultural products raised or produced.

## **CENSUS DISCLOSURE RULES**

In keeping with the provisions of Title 13, United States Code, no data are published that would disclose the operations of an individual farm. However, the number of farms in a given size category or other classification, such as size of farm, is not considered a release of confidential information and is provided even though other information is withheld.

## **DEFINITIONS AND EXPLANATIONS**

Appendix A includes definitions and an explanation of selected terms used in the tables.

## **INVENTORIES, PRODUCTION, AND SALES DATA**

Inventories of livestock, poultry, and machinery and equipment are measured as of December 31 of the census year. Crop and livestock production, sales, and expense data are for the calendar year, except for a few crops (such as citrus) for which the production year overlaps the calendar year.

## **ABBREVIATIONS AND SYMBOLS**

The following abbreviations and symbols are used throughout the tables:

- Represents zero.
- (D) Withheld to avoid disclosing data for individual farms.
- (NA) Not available.
- (X) Not applicable.

**Table 1. Selected Characteristics for the United States and 10 Leading States: 1992**

**Table 1. Selected Characteristics for the United States and 10 Leading States: 1992—Con.**

[For meaning of abbreviations and symbols, see introductory text]

Characteristics	Ten leading States—Con.									
	6		7		8		9		10	
	State	Percent of U.S. total	State	Percent of U.S. total	State	Percent of U.S. total	State	Percent of U.S. total	State	Percent of U.S. total
<b>SELECTED MEASURES OF AGRICULTURE</b>										
Farms . . . . . number . . . . .	IL	4.0	MN	3.9	TN	3.9	OH	3.7	WI	3.5
Farms with sales of \$100,000 or more . . . . . number . . . . .	TX	5.1	NE	4.8	IN	3.6	KS	3.5	MO	3.2
Total cropland . . . . . acres . . . . .	NE	5.1	MN	4.9	SD	4.5	MO	4.4	MT	4.0
Harvested cropland . . . . . acres . . . . .	TX	6.1	NE	5.5	SD	4.6	MO	4.1	IN	4.0
Irrigated land . . . . . acres . . . . .	AR	5.5	KS	5.4	MT	4.0	FL	3.6	WA	3.3
Harvested cropland . . . . . acres . . . . .	CO	5.9	KS	5.8	FL	3.6	WA	3.4	MT	3.3
<b>VALUE OF SALES</b>										
Market value of agricultural products sold . . . . . \$1,000 . . . . .	IL	4.5	MN	4.0	FL	3.2	WI	3.2	NC	3.0
Crops, including nursery and greenhouse crops . . . . . \$1,000 . . . . .	MN	4.1	IN	3.6	NE	3.5	WA	3.3	KS	3.0
Livestock, poultry, and their products . . . . . \$1,000 . . . . .	WI	4.7	MN	3.9	CO	3.5	NC	3.2	OK	3.2
<b>SELECTED FARM PRODUCTION EXPENSES<sup>1</sup></b>										
Livestock and poultry purchased . . . . . \$1,000 . . . . .	OK	4.8	CA	4.1	SD	2.7	MN	2.6	ID	2.3
Feed for livestock and poultry . . . . . \$1,000 . . . . .	NE	4.5	AR	4.0	MN	3.8	GA	3.8	WI	3.3
Commercial fertilizer . . . . . \$1,000 . . . . .	MN	4.9	NE	4.2	OH	3.7	MO	3.7	FL	3.5
Petroleum products . . . . . \$1,000 . . . . .	NE	4.7	KS	4.6	IN	3.4	MO	3.2	NC	3.0
Hired farm labor . . . . . \$1,000 . . . . .	OR	2.8	WI	2.8	PA	2.7	NY	2.6	MI	2.5
Interest expense . . . . . \$1,000 . . . . .	NE	4.7	WI	4.3	KS	3.9	IN	3.6	MO	3.6
Agricultural chemicals . . . . . \$1,000 . . . . .	TX	4.7	IN	4.0	MS	3.5	NE	3.3	AR	3.3
<b>LIVESTOCK AND POULTRY</b>										
Cattle and calves inventory . . . . . number . . . . .	MO	4.3	IA	4.1	WI	4.0	SD	3.9	CO	3.2
Cows and heifers that had calved inventory . . . . . number . . . . .	SD	4.1	WI	4.1	MT	3.6	KS	3.6	IA	3.2
Beef cows . . . . . number . . . . .	MT	4.6	KS	4.4	KY	3.3	IA	3.3	TN	3.0
Milk cows . . . . . number . . . . .	TX	4.2	MI	3.3	OH	3.1	IA	2.7	WA	2.6
Cattle and calves sold . . . . . number . . . . .	IA	4.6	CA	4.2	SD	3.5	MO	3.3	WI	2.6
Cattle fattened on grain and concentrates sold . . . . . number . . . . .	OK	3.8	CA	3.1	SD	2.9	ID	2.8	IL	2.5
Hogs and pigs inventory . . . . . number . . . . .	NE	7.3	MO	5.1	SD	3.4	OH	3.4	KS	2.8
Feeder pigs sold . . . . . number . . . . .	IN	5.6	MO	5.4	AR	4.1	OH	3.9	SD	3.3
Sheep and lambs inventory . . . . . number . . . . .	MT	5.9	UT	4.8	NM	4.3	IA	3.8	OR	3.6
Sheep and lambs sold . . . . . number . . . . .	IA	5.6	MT	4.9	OR	4.2	UT	4.0	NM	2.8
Horses and ponies inventory . . . . . number . . . . .	CO	3.4	MO	3.2	TN	3.0	PA	2.8	MT	2.8
Hens and pullets of laying age inventory . . . . . number . . . . .	AR	5.8	TX	5.6	NC	4.8	MN	4.2	AL	3.9
Broilers and other meat-type chickens sold . . . . . number . . . . .	TX	5.4	MD	4.7	CA	4.1	DE	4.1	VA	3.7
Turkeys sold . . . . . number . . . . .	MO	6.0	IN	4.5	TX	4.1	IA	3.4	PA	3.0
<b>SELECTED CROPS HARVESTED</b>										
Corn for grain or seed . . . . . acres . . . . .	OH	5.0	SD	4.5	WI	4.1	MO	3.5	MI	3.2
Sorghum for grain or seed . . . . . acres . . . . .	OK	2.6	SD	2.3	IL	1.8	NM	1.7	LA	1.6
Wheat for grain . . . . . acres . . . . .	SD	5.7	MN	4.4	WA	4.2	CO	4.0	NE	3.0
Barley for grain . . . . . acres . . . . .	SD	5.3	CA	3.0	OR	1.9	CO	1.7	UT	1.5
Oats for grain . . . . . acres . . . . .	PA	4.4	NE	4.2	TX	3.4	KS	2.8	OH	2.8
Soybeans for beans . . . . . acres . . . . .	OH	6.7	AR	5.6	NE	4.0	SD	3.6	KS	3.0
Dry edible beans, excluding dry limas . . . . . acres . . . . .	MN	6.5	CA	5.1	NY	2.4	WA	2.3	WY	1.9
Cotton . . . . . acres . . . . .	TN	5.5	AL	3.9	GA	3.9	AZ	3.9	NC	3.3
Rice . . . . . acres . . . . .	MO	3.3	FL	.6	—	—	—	—	—	—
Peanuts for nuts . . . . . acres . . . . .	OK	5.5	FL	4.6	NM	1.0	SC	.8	MS	.4
Tobacco . . . . . acres . . . . .	GA	4.9	OH	1.3	IN	1.1	MD	1.0	PA	1.0
Irish potatoes . . . . . acres . . . . .	WI	5.8	CO	5.2	OR	3.6	MI	3.5	CA	3.4
Sugar beets for sugar . . . . . acres . . . . .	NE	6.0	WY	5.0	MT	4.0	CO	3.0	TX	2.6

# Appendix A.

## General Explanation

---

### DATA COLLECTION

#### Method of Enumeration

All agriculture censuses beginning with the 1969 census primarily have used mailout/mailback data collection. Direct enumeration methods, however, continue to be used for the agriculture censuses in Guam and the U.S. Virgin Islands, and parts of Puerto Rico. The report for each area includes a discussion of the method of enumeration.

#### Mail List

The mail list for the 1992 census was comprised of individuals, businesses, and organizations that could be readily identified as being associated with agriculture. The list was assembled from the records of the 1987 census, administrative records of the Internal Revenue Service (IRS), and the statistical records of the U.S. Department of Agriculture (USDA). In addition, lists of large or specialized operations, such as nurseries and greenhouses, poultry farms, fish farms, livestock farms, and cattle feedlot operations were obtained from State and Federal agencies, trade associations, and similar organizations. Lists of companies having one or more establishments or locations producing agricultural products were obtained from the 1987 census and updated using the information from the Standard Statistical Establishment List maintained by the Census Bureau. Exhaustive record linkage, unduplication, and mathematical modeling yielded a final mail list of 3.55 million names and addresses which had a substantial probability of being farm operations.

#### Report Forms

In 1992, three different report forms were used—a sample form, a nonsample form, and a screener form—to minimize the reporting burden, particularly for small farms and places less likely to be farms. The screener form was the same as the nonsample form except section 1 of the screener form listed crop and livestock items, asked if the respondent had any of the items at any time in 1992, and omitted a question on grazing permits. The sample form contained all the questions asked on the nonsample form plus additional questions in sections 21 through 26 on commercial fertilizer, chemicals, production expenses, machinery and equipment, value of land and buildings, and

income from farm-related sources. The information collected in the sample sections gave the Bureau of the Census a good basis for making estimates of these data for other farms included in the census. There were 11 regional versions of the nonsample and screener forms and 13 regional versions of the sample form with the listings of crops varying by region. Appendix B contains a copy of the sample form and the information sheet.

The sample form was mailed to 1,030,000 addresses on the mail list, including all those expected to be large (based on expected sales or acreage); all farms operated by multiestablishment companies or nonprofit organizations, all those in Alaska, Hawaii, and Rhode Island; and a sample of other addressees. The screener form was mailed to 412,000 addressees. These were less likely to be farms or expected to be small farms. The nonsample form was mailed to the remaining 2,112,000 addressees.

### INITIAL MAILING

The report forms were mailed in mid-December 1992 to approximately 3,554,000 individuals, businesses, and organizations on the mail list. The mail packages included a report form with a description of the purposes and uses of the census on the last page, a cover letter, an information sheet containing instructions for completing the form, and a postage paid return envelope. Additional special instructions were included with report forms sent to grazing associations, feedlot operations, institutional organizations, Indian reservations, and firms with multiple farm or ranch operations. Special instructions also were sent to producers of poultry under contract, bees and honey, fish and other aquaculture products, laboratory animals, and nursery and greenhouse crops.

To provide additional help to farmers in completing their reports, copies of the 1992 Census of Agriculture Report Form Guide booklet were sent to vocational agriculture instructors, USDA county offices of the Agriculture Stabilization and Conservation Service, the Cooperative Extension Service, land-grant colleges, State departments of agriculture, and farm organizations. The Guide contained descriptions and definitions of various items in more detail than was contained in the instructions included with each report form. Representatives of the above agencies graciously consented to assist farmers in completing their report forms.

## Followup Procedures

A thank you/reminder card was mailed to those on the mail list in early January 1993. Four followup letters, three of which were accompanied by a report form, were sent to nonrespondents at 5-week intervals starting in mid-February and continuing until early June 1993.

Telephone calls were made to all large farm operators who had not responded. In addition, telephone calls were made to a sample of other nonrespondents in counties which had a response rate of less than 75 percent. A nonresponse adjustment procedure was used to represent the final nonrespondent farms in the census results.

## MAJOR DATA CHANGES

Prior to each agriculture census, the Census Bureau reviews the content of the census report forms to eliminate inquiries no longer needed, to identify new items necessary to meet user needs, and to better describe the agricultural situation in the Nation. Data requests are solicited from farm organizations, land-grant colleges and universities, State and Federal agencies, State departments of agriculture, agribusinesses, and other users. Each user is asked to identify and justify its specific data needs. The following data inquiries were added to the 1992 report form:

- Hired farm workers who worked—
  - 150 days or more
  - less than 150 days
- Number of landlords
- Value of agricultural products sold directly to individuals for human consumption
- Injuries and deaths that occurred on the farm
- Wheat by type
- Canola, other (industrial) rapeseed
- Fresh herbs, dried herbs, ginseng
- Hybrid striped bass and crawfish

Wording changes were made in farm program participation questions to reflect changes in the program. Questions on landlord and renter names, addresses, and acres were eliminated from the 1992 report form.

## DATA PROCESSING

Selected report forms were reviewed prior to keying the data. These included reports with attached correspondence, reports with remarks or no positive data on the front page, and reports with the screener questions indicating no crop or livestock production in 1992.

The data from each report form were subjected to a detailed item-by-item computer edit. The edit performed comprehensive checks for consistency and reasonableness, corrected erroneous or inconsistent data, supplied missing data based on similar farms within the same

county, and assigned farm classification codes necessary for tabulating the data. Substantial computer-generated changes to the data were clerically reviewed and verified.

In the computer edit, farms with sales, acreage, or commodities exceeding specified levels were tested for historical comparability. Key items, such as acreage and sales, were compared for substantial changes between 1987 and 1992. Sizeable historical differences were resolved or verified by telephone, if necessary. Prior to publication, tabulated totals were reviewed by statisticians to identify inconsistencies and potential coverage problems. Comparisons were made with previous census data, estimates published by the USDA, and other available data.

## DEFINITIONS AND EXPLANATIONS

The following definitions and explanations provide a more detailed description of the terms used in this publication than are available in the tables or on the report form. Items in the tables which carry the note "See text" are also explained. For an exact wording of the questions on the 1992 census report forms and the information sheet which accompanied these forms, see appendix B. Most definitions of terms are the same as those used in earlier censuses. The more important exceptions are also noted here.

**Acres and quantity harvested.** Crops were reported in whole acres, except for the following crops which were reported in 10ths of acres: Irish potatoes, sweetpotatoes, tobacco, fruit and nut crops including land in orchards, berries, vegetables, and nursery and greenhouse crops in the open; and in Hawaii, taro, ginger root, and lotus root. Nursery and greenhouse crops grown under glass or other protection were reported in square feet. Totals for crops reported in 10ths of acres were rounded to whole acres at the aggregate level during the tabulation process.

If two or more crops were harvested from the same land during the year, the acres were to be counted for each crop. Therefore, the total acres of all crops harvested generally exceeded the acres of cropland harvested. An exception to this procedure was hay crops. When more than one cutting of hay was taken from the same acres, the acres were counted only once but the quantity harvested included all cuttings. However, hay cut for both dry hay and green chop or silage were to be reported for each applicable crop. For interplanted crops or "skip-row" crops, acres were to be reported according to the portion of the field occupied by each crop.

If a crop was planted but not harvested, the acres were not to be reported as harvested. These acres were to be reported in the "land use" section under the appropriate cropland items—cropland used only for pasture or grazing, cropland used for cover crops, cropland on which all crops failed, or cropland idle.

Corn and sorghum, hogged or grazed, were to be reported as "cropland harvested" and not as "cropland

used only for pasture or grazing." Crop residue left in fields and later hogged or grazed was not reported as cropland pasture.

Quantity harvested was not obtained for crops such as vegetables; nursery and greenhouse crops; corn cut for dry fodder, hogged or grazed; and sorghum, hogged or grazed.

Acres of land in bearing and nonbearing fruit orchards, citrus or other groves, vineyards, and nut trees were to be reported as harvested cropland regardless of whether the crop was harvested or failed. However, abandoned orchards were to be reported as cropland idle, not as harvested cropland and the individual abandoned orchard crop acres were not to be reported.

**Agricultural chemicals used, including fertilizer.** For each type of agricultural chemical, the acres treated were to be reported only once even if the acres were fertilized or treated more than once. If multipurpose chemicals were used, the acres treated for each purpose were to be reported.

**Chemicals.** See Agricultural chemicals used, including fertilizer; Production expenses—Agricultural chemicals.

**Cherries.** For 1992, cherries were reported as sweet cherries, tart cherries, or cherries depending on the regional form the respondent completed. On regional forms for States where cherries were an important fruit crop, sweet cherries and tart cherries were listed separately. On the other regional forms, either cherries were listed or could be written in. For publication purposes, cherries, total could be shown along with the individual breakdown of sweet cherries, tart cherries, or cherries, not specified. Cherries, not specified was used to account for cherries where the sweet and tart breakdown was not asked or where respondents wrote in cherries but did not specify or code the kind of cherry. All the individual cherry items may not be shown for a given State.

**Citrus enumeration.** In the 1992 census, reports for selected citrus caretakers in Arizona, Florida, and Texas were obtained by direct enumeration. A citrus caretaker is an organization or person caring for or managing citrus groves for others. This special enumeration has been used in recent censuses because of the difficulty in identifying and enumerating absentee grove owners who often do not know the information that is needed to adequately complete the census report form. Each citrus caretaker was enumerated as a farm operator and requested to complete one report form for all groves cared for and to furnish a list of grove owners' names, addresses, and acres of citrus. The names on the lists were matched to completed grove owners' report forms to eliminate duplication. The caretaker also was requested to inform the grove owner that he/she had already reported for the citrus under his/her care and that the grove owner was not to report the citrus again. In the 1992 census, 3 caretakers in Arizona reported

65 grove owners having 7,300 acres of citrus; the 44 caretakers in Florida reported 2,300 grove owners having 150,000 acres of citrus; and 12 caretakers in Texas reported 400 grove owners having 14,000 acres of citrus.

**Commodity Credit Corporation loans.** This category includes loans for corn, wheat, soybeans, sorghum, barley, oats, cotton, sunflower seed, flaxseed, safflower, canola, rapeseed, mustard seed, peanuts, rye, rice, tobacco, and honey.

**Conservation Reserve Programs or Wetlands Reserve Programs.** See Cropland in the Conservation Reserve Programs (CRP) or Wetlands Reserve Programs (WRP).

**Crop units of measure—field crops.** The regional report forms allowed the operator to report the quantity of field crops harvested in a unit of measure commonly used in the region. When the operator reported in a unit of measure different than the unit of measure published, the quantity harvested was converted to the published unit of measure.

**Crop units of measure—fruit crops.** Grapes could be reported in dry weight or fresh weight; plums and prunes in fresh weight or prunes in dry weight; and in Hawaii, coffee in pounds parchment or pounds cherry, and macadamia nuts in pounds husked, unshelled or pounds shelled. For other fruit and nut crops and citrus, the operator was given a choice of units of measure of pounds, tons, or boxes. The quantity harvested for these crops was published in pounds.

**Crop year or season covered.** Acres and quantity harvested are for the calendar year 1992 except for citrus fruits, avocados, olives, vegetables in Florida, sugarcane in Florida and Texas, and pineapples and coffee in Hawaii.

*Citrus fruits.* The data for Florida relate to the quantity harvested in the September 1991 through July 1992 harvest season, except limes that were harvested in the April 1992 through March 1993 harvest season. The data for Texas relate to the quantity harvested in the September 1991 through May 1992 harvest season. The data for States other than Florida and Texas, relate to the quantity harvested in the 1991-92 harvest season.

*Vegetables.* The data for Florida relate to the crop harvested in the 1991-92 harvest season.

**Cropland, harvested.** This category includes land from which crops were harvested or hay was cut, and land in orchards, citrus groves, vineyards, nurseries, and greenhouses. Land from which two or more crops were harvested was counted only once.

**Cropland in annual commodity acreage adjustment programs.** This category includes land diverted or set aside under the provisions of the Federal Commodity

Acreage Program. These data are for the acres of cropland taken out of production by growers of wheat, cotton, corn, sorghum, and barley, and devoted to conservation uses. Information was not obtained as to which crops would have been grown on the acres set aside.

**Cropland in the Conservation Reserve Programs or Wetlands Reserve Programs.** These categories include acres of "highly erodible" cropland taken out of agricultural production and planted in protective cover crops or reforested. The Food, Agriculture, Conservation, and Trade Act of 1990 amended the Conservation Reserve Program (CRP) authorized by the Food Security Act of 1985. The 1990 Act continues the CRP and puts greater emphasis on preserving and upgrading water quality by establishing a new Wetlands Reserve Program that provides for annual rental payments and shared costs of conservation practices through a minimum ten-year contract with the USDA.

**Cropland, irrigated.** See Irrigated land.

**Cropland, total.** This category includes land from which crops were harvested or hay was cut; land in orchards, citrus groves, vineyards, nurseries, and greenhouses; cropland used only for pasture or grazing; land in cover crops, legumes, and soil-improvement grasses; land on which all crops failed; land in cultivated summer fallow; and idle cropland.

**Data are based on a sample of farms.** For censuses since 1978, selected data were collected from only a sample of farms. These data are subject to sampling error. For 1992, the sample form was mailed to approximately 29 percent of all farms, including all large and specialized farms (based on expected sales, acres, or standard industrial classification), all farms in Alaska, Hawaii, and Rhode Island, and a sample of all other farms. Sections 21 through 26 of the 1992 sample forms included inquiries on commercial fertilizer, chemicals, production expenses, machinery and equipment, value of land and buildings, and income from farm-related sources.

**Direct sales to consumers.** See Value of agricultural products sold directly to individuals for human consumption.

**Diverted acres.** See Cropland in annual commodity acreage adjustment programs.

**Expenses.** See Production expenses.

**Farms by combined government payments and market value of agricultural products sold (Table 18).** This tabulation is new. Its data can be compared to data by market value of agricultural products sold in table 24 to analyze the difference in economic size when government payments are added to value of sales. Combined sales

and government payments may be a better measure of economic size of farm because many payments compensate for acres idled to comply with government programs.

**Farms by market value of agricultural products sold or value of sales.** In 1992 and 1987, all farms were tabulated by size based on reported sales. In 1982 and earlier censuses, abnormal farms were not tabulated based on sales size. In the tables on market value of agricultural products sold, the sales of abnormal farms in 1982 and earlier censuses were included in the total sales figure but excluded from the detailed size categories. Abnormal farms include institutional farms, experimental and research farms, and Indian reservations.

**Farms or farms reporting.** The term "farms" or "farms reporting" in the presentation of data denotes the number of farms reporting the item. For example, if there are 3,710 farms in a State and 842 of them had 28,594 cattle and calves, the data for those farms reporting cattle and calves would appear as:

Cattle and calves .....	farms .....	842
	number.....	28,594

**Fertilizer.** See Agricultural chemicals used, including fertilizer; Production expenses—Commercial fertilizer.

**Government payments.** This category is limited to direct cash payments received by the farm operator in 1992 and 1987. It includes deficiency and diversion payments; wool payments; payments from the Conservation Reserve Program, the Wetlands Reserve Program, other conservation programs, and all other federal farm programs under which payments were made directly to farm operators.

**Grapes.** Farm operators were given the option of reporting the quantity of grapes harvested in dry weight or fresh weight. For publication purposes, all quantities of grapes harvested have been converted to pounds fresh weight. The conversion used was 4 pounds fresh weight to 1 pound dry weight.

**Hay—alfalfa, other tame, small grain, wild, grass silage, green chop, etc.** Data shown for hay represent all hay crops, including grass silage, haylage, and hay crops cut and fed green (green chop). In production data, dry tons represent dry tonnage for the various hay categories and dry weight equivalents for grass silage and hay cut and fed green. The conversion used was 3 tons of green weight to 1 ton of dry weight.

**Hay—tame hay other than alfalfa, small grain, and wild hay.** Data shown represent dry tons of hay harvested from clover, lespedeza, timothy, Bermuda grass, Sudan grass, and other types of legume and tame grasses.

**Hired farm labor.** Data are for total hired workers including paid family members, workers who worked less than 150 days, and workers who worked 150 days or more.

**Income.** See Net cash return from agricultural sales for the farm unit.

**Irrigated land.** This category includes all land watered by any artificial or controlled means, such as sprinklers, furrows or ditches, and spreader dikes. Included are supplemental, partial, and preplant irrigation. Each acre was to be counted only once regardless of the number of times it was irrigated or harvested.

**Land in farms.** The acreage designated as "land in farms" consists primarily of agricultural land used for crops, pasture, or grazing. It also includes woodland and wasteland not actually under cultivation or used for pasture or grazing, provided it was part of the farm operator's total operation. Large acreages of woodland or wasteland held for nonagricultural purposes were deleted from individual reports during the processing operations. Land in farms includes acres set aside under annual commodity acreage programs as well as acres in the Conservation Reserve and Wetlands Reserve Programs for places meeting the farm definition.

Land in farms is an operating unit concept and includes land owned and operated as well as land rented from others. Land used rent free was to be reported as land rented from others. All grazing land, except land used under government permits on a per-head basis, was included as "land in farms" provided it was part of a farm or ranch. Land under the exclusive use of a grazing association was to be reported by the grazing association and included as land in farms. All land in Indian reservations used for growing crops or grazing livestock was to be included as land in farms. Land in reservations not reported by individual Indians or non-Indians was to be reported in the name of the cooperative group that used the land. In some instances, an entire Indian reservation was reported as one farm.

**Land in orchards.** This category includes land in bearing and nonbearing fruit trees, citrus or other groves, vineyards, and nut trees of all ages, including land on which all fruit crops failed. Respondents were instructed not to report abandoned plantings and plantings of fewer than 20 total fruit, citrus, nut trees, or grapevines.

**Land in two or more counties.** With few exceptions, the land in each farm was tabulated as being in the operator's principal county. The principal county was defined as the one where the largest value of agricultural products was raised or produced. It was usually the county containing all or the largest proportion of the land in the farm or viewed by the respondent as his/her principal county. For a limited number of Midwest and Western States, this procedure has resulted in the allocation of more land in farms to a

county than the total land area of the county. To minimize this distortion, separate reports were required for large farms identified from the 1987 census as having more than one farm unit. Other reports received showing land in more than one county were separated into two or more reports if the data would substantially affect the county totals.

**Market value of agricultural products sold.** This category represents the gross market value before taxes and production expenses of all agricultural products sold or removed from the place in 1992 regardless of who received the payment. It includes sales by the operator as well as the value of any shares received by partners, landlords, contractors, or others associated with the operation. In addition, it includes receipts from placing commodities in the Commodity Credit Corporation (CCC) loan program in 1992. It does not include payments received for participation in other federal farm programs nor does it include income from farm-related sources such as customwork and other agricultural services, or income from nonfarm sources.

The value of crops sold in 1992 does not necessarily represent the sales from crops harvested in 1992. Data may include sales from crops produced in earlier years and may exclude some crops produced in 1992, but held in storage and not sold. For commodities, such as sugar beets and wool, sold through a co-op which made payments in several installments, respondents were requested to report the total value received in 1992.

The value of agricultural products sold was requested of all operators. If the operator failed to report this information, estimates were made based on the amount of crops harvested, and livestock or poultry inventory or number sold. Extensive estimation was required for operators growing crops or livestock under contract.

Caution should be used when comparing sales in 1992 with sales reported in earlier censuses. Sales figures are expressed in current dollars and have not been adjusted for inflation or deflation.

**Misreported or miscoded crops.** In a few cases data may have been reported on the wrong line, in the wrong section, or the wrong crop code may have been assigned to a small number of write-in crops. A few of these errors may not have been identified and corrected during processing which resulted in rare cases of inaccurately tabulated data. Reports with significant acres of unusual crops for the area were examined to minimize the possibility that they were in error.

**Net cash return from agricultural sales for the farm unit.** Net cash return is derived by subtracting total operating expenditures from the gross market value of agricultural products sold. Both gross sales and production expenditures include sales and expenses of the farm operator as well as those of partners, landlords, and contractors. Therefore, the net cash return is that of the farm unit rather than the net farm income of the operator.

Operating expenses used in calculating net cash return do not include depreciation or changes in inventory values. Expenses may have been understated on farms renting land from others because taxes paid by landlords are excluded, and insurance and other landlord expenses not readily known to renters may have been omitted or underestimated.

**Nursery and greenhouse crops grown for sale.** These data are summations of the individual items reported. All of the individual items may not be shown.

**Other livestock and livestock products.** This category includes all livestock and livestock products not having specific codes on the 1992 report form.

**Plums and prunes.** Farm operators were given the option of reporting the quantity of plums and prunes harvested in dry weight or fresh weight. For publication purposes, all quantities of plums and prunes harvested have been converted to pounds of fresh weight. The conversion used was 2.90 pounds fresh weight to 1 pound dry weight.

**Production expenses.** Total farm production expenses include the share of the expenditures provided by landlords, contractors, and partners in the operation of the farm business. Property taxes paid by landlords are excluded. Expenses are limited to those incurred in the operation of the farm business. Expenditures for nonfarm activities; farm-related activities such as providing customwork for others, the production and harvest of forest products, and recreational services; and household expenses are excluded. In 1992, as in other recent censuses, operators producing crops, livestock, or poultry under contract often were unable or unwilling to estimate the cost of production inputs furnished by the contractors. As a consequence, extensive estimation for some expenditure items was required for contract producers. Explanations of selected production expenses are listed below.

*Agricultural chemicals.* These expenses include the cost of all insecticides, herbicides, fungicides, and other pesticides, including costs of custom application. Data exclude commercial fertilizer purchased. The cost of custom application was excluded from the 1982 data.

*Commercial fertilizer.* The expense for commercial fertilizer is the amount spent on fertilizer including the cost of custom application. The cost of custom application was excluded from the 1982 data.

*Feed for livestock and poultry.* These expenses include the cost of all feed for livestock and poultry including grain, hay, silage, mixed feeds, concentrates, etc.

*Interest.* In 1992 and 1987, separate data were collected for interest paid on debts secured by real estate and interest paid on debts not secured by real estate. In 1982, only total interest expenses were collected.

**Sales, total.** See Total sales; Market value of agricultural products sold; Farms by market value of agricultural products sold or value of sales.

**Total sales.** This item represents the gross market value of all agricultural products sold before taxes and expenses in the census year including livestock, poultry, and their products; and crops, including nursery and greenhouse crops, and hay. Respondents were asked to include landlords' and contractors' shares. The value of commodities placed in CCC loans is included as sold. In 1992 and 1987, all farms including abnormal farms were tabulated by size based on reported sales. In 1982, abnormal farms were included in the total sales figure but excluded from the detailed size breakdowns. Abnormal farms include institutional farms, experimental and research farms, and Indian reservations.

**Value of agricultural products sold directly to individuals for human consumption.** This item, eliminated from the 1987 report form, was added back to the census for 1992. The item represents the value of agricultural products produced and sold directly to individuals for human consumption from roadside stands, farmers' markets, pick-your-own sites, etc. It excludes nonedible products such as nursery products, cut flowers, wool, etc. Sales of agricultural products by vertically integrated operations through their own processing and marketing operations were excluded.

**Value of land and buildings.** Respondents were asked to report their estimate of the current market value of land and buildings owned, rented or leased from others, and rented or leased to others. Market value refers to the value the land and buildings would sell for under current market conditions. If the value of land and buildings was not reported, it was estimated using the average value of land and buildings from a similar farm in the same geographic area.

**Vegetables harvested for sale.** The acres of vegetables harvested is the summation of the acres of individual vegetables harvested.

**Wheat for grain.** For 1992, wheat was listed on the report form separately or in combinations by type as listed below, depending on the regional report form completed by the respondent.

- Wheat for grain
- Winter wheat for grain
  - Spring wheat for grain
- Winter wheat for grain
  - Durum wheat for grain
  - Spring wheat, other than durum, for grain

For publication, wheat was shown separately or in combinations by type as listed, depending on the State for which it was published.

Wheat for grain, total  
 Winter wheat for grain  
 Spring wheat for grain  
 Durum wheat for grain  
 Other spring wheat for grain  
 Non-specified wheat for grain

The wheat by type (winter, spring, durum, and other spring) breakdown was published for States where more than one type was commonly produced; all the types may not be shown. Non-specified wheat was shown when a type not commonly produced in a State was reported on a report form not intended for use for that State or when reporting errors were suspected.

**Wheat by type.** Data were not available for 1987.

**Write-in crops.** To reduce the length of the report form, only the major crops for each region were prelisted. For other crops, the respondent was asked to look at a list of crops in each section and write in the crop name and its code. For crops that had no individual code listed on the report form, the respondent was to write in the crop name and code the crop into the appropriate "all other" category for that section. Write-in crops coded as "all other" were reviewed and assigned a specific code when possible. Crops not assigned a specific code were left in the appropriate "all other" category.

In some cases, the reviewers were unable to determine the specific crop reported by the respondent because of incomplete or generalized crop names. To ensure proper

coding, most of these respondents were telephoned. Reports for those not telephoned were changed on the basis of other reports for the area.

## STATISTICAL METHODOLOGY

The 1992 Census of Agriculture used two types of statistical estimation procedures. These estimation procedures accounted both for nonresponse to the data collection and for the sample data collection. These procedures are used because some farm operators never respond to the census despite numerous attempts to contact them, and not all farm operators are requested to provide the sample data items. The statistics in this report are estimates derived from these procedures.

There are two types of errors possible in these estimates—sampling and nonsampling. Sampling errors in the census data result from the nonresponse sample and the census sample data collection. Nonsampling errors arise from incompleteness of the census mail list, duplication in the mail list, incorrect data reporting, errors in editing of reported data, and errors in imputation for missing data. Extensive efforts are made to minimize both types of errors through efficient sample designs, quality control, verification, and clerical review of specific operations.

For a complete and detailed explanation of the statistical methodology, and the reliability of census estimates, see Volume 1, State and County Data, appendix C.

## Appendix B. **Report Form and Information Sheet**

---

The report form and information sheet are shown on the following pages.

# Publication Program

## 1992 CENSUS OF AGRICULTURE

Results of the 1992 Census of Agriculture are published in a series of reports that provide data at the national, State, and county (or equivalent) levels for the United States. Data also are available for Puerto Rico, Guam, and the Virgin Islands of the United States.

### VOLUME 1. GEOGRAPHIC AREA SERIES (AC92-A-1 TO -54)

**National, State, and County Data** are published in detailed national and State tables for the United States, and in State and county tables for each State. These reports include data on number and size of farm; crop production; livestock, poultry, and their products; tenure, age, and principal occupation of operator; type of organization; value of products sold; government payments plus market value of agricultural products sold; production expenses; direct marketing; number of hired employees; land use; irrigation; and the standard industrial classification of farms.

#### U.S. Summary and State Data Report (AC92-A-51)

Chapter 1. National-level data

Chapter 2. State-level data

#### State and County Data Reports (AC92-A-1 to -50)

Chapter 1. State-level data

Chapter 2. County-level data

**Outlying Areas Data (AC92-A-52 to -54)** are published for the regions and municipios of Puerto Rico, the election districts on Guam, and the islands of the Virgin Islands of the United States.

### VOLUME 2. SUBJECT SERIES (AC92-S-1 TO -5)

**Agricultural Atlas of the United States (AC92-S-1)** graphically illustrates a profile of the Nation's agriculture at the county level in a series of dot and multicolor pattern maps. The maps provide displays on sizes and types of farms, land use, farm tenure, market value of agricultural products sold, crops harvested, livestock inventories, and other characteristics of farms.

**Coverage Evaluation (AC92-S-2)** provides national- and regional-level estimates on the completeness of the census, in terms of both the number of farms missed and selected characteristics of those farms.

**Ranking of States and Counties (AC92-S-3)** ranks the leading States and counties for selected items from the 1992 census. Tables show cumulative percent of U.S. totals and most include comparative data from the 1987 census.

**History (AC92-S-4)** provides a detailed description of the planning and conduct of the 1992 Census of Agriculture. It explains the history of the agriculture census, farm definition, data collection and processing, data dissemination, coverage evaluation and research, and the census of agriculture in outlying areas. Also included are facsimiles of the report forms, information sheets, and letters sent to the public.

**ZIP Code Tabulations of Selected Items from the 1992 and 1987 Censuses of Agriculture (AC92-S-5)** provides tabulations by five-digit ZIP Code for selected items from the 1992 and 1987 censuses. Data items include number of farms, land in farms, farms by size, market value of agricultural products sold by size of sales, livestock inventory, cropland harvested, selected crops, and other data.

### VOLUME 3. 1994 FARM AND RANCH IRRIGATION SURVEY (AC92-RS-1)

This report provides data collected from a sample of irrigated farm operations identified in the 1992 Census of Agriculture. Data items include acres irrigated, land use, yields of specified crops, methods of water distribution, quantity of water used by source, expenses, and other irrigation practices. Data are available for each of the 17 Western States, 10 other leading irrigation States, and the 18 water resources regions of the conterminous United States.

### PRINTED REPORTS

All of the reports listed above are available as printed reports, except Volume 2, Part 5, ZIP Code Tabulations. To obtain order forms or further information concerning any agriculture census printed reports, write the Bureau of the Census, Agriculture and Financial Statistics Division, Editorial and Information Staff, Washington, D.C. 20233-8300 or call 1-800-523-3215.

### ELECTRONIC PRODUCTS

- **Computer Tapes**—Public-use computer tapes contain the same summary statistics published in the Volume 1 reports.
- **Compact Disc-Read Only Memory (CD-ROM)**—Data from Volume 1, Volume 2 parts 1 and 5, and Volume 3 are available on CD-ROM.
- **Online Access**—Highlights from Volume 1, Volume 2 parts 3 and 5, and Volume 3 are available on the ARI Network<sup>R</sup> and on CENDATA<sup>TM</sup> through DIALOG<sup>R</sup> and CompuServe<sup>R</sup>.

For additional information regarding electronic data products, write the Data User Services Division, Customer Services, Bureau of the Census, Washington, D.C. 20233-8300 or call 301-763-4100.
