THE UP-TO-DATE MAP OF WISCONSIN

has been published to fill a long felt need in the map world. Tourists and travelers have been continually complaining about the maps they have been using, and in putting up this map we have carefully looked into all the complaints we could find and tried to make the necessary corrections where possible. In summing up the different complaints we found that in many maps the highways were incorrect, as well as the railroads; it was hard to find some of the towns by the locations given and the mileage where shown on the maps was incorrect in a great many cases; folding maps were always wearing out on the creases, and in case a map had to be opened while the wind was blowing there was great danger of it being blown to pieces. With all these things in mind we set out to publish the series of copyrighted up to date maps, **covering every state in the Union,** and it is our expectation to make all our maps so complete, so accurate, and so necessary for the tourist that every tourist whether traveling by auto or rail will find it necessary to have one.

INSTRUCTIONS FOR USING MAP.

The map of Wisconsin contains 40 pages of maps— 29 of these covering all the counties in the state, 5 special railroad maps, 4 special highway maps, as well as an outline map of the state on the inside of the cover.

TO FIND A TOWN

turn to the general index, covering pages 3 to 17 and there you will find the town listed in its alphabetical order. The general index is divided into five columns. The first column gives population, and in most of the larger towns and cities we have been able to secure the 1920 census, in the other towns it is the estimated population. The third column gives the page of the county map where the town is located. The fourth column gives the auto route, if any, and the page the auto route is found on. The fifth column gives the number of the page of the railroad that the town is on. In this way, if you are not particular about the county or exact location of the town, and are traveling by auto you can turn immediately to the page of the special auto map, and in the index on the opposite page it will show the exact location of the town on the highway, as well as all other towns on the same highway, giving several main roads on the same page and some cross lines. In traveling by railroad the same method is used, turning to the page in the railroad column you will find the town listed in the index on the opposite page. We have originated a new system of locating the towns on each map. Instead of the old method of looking across the top to find a certain letter and down the side to find a certain number and trying to figure where the imaginary lines cross, we have divided the map into 100 squares, 10 across and 10 deep, numbering from 1 to 10, 11 to 20 etc.

COUNTY INDEX.

The first column gives the number of the space where the town is found, for instance if it says 23 you go across the third row, containing the twenties, to the third space marked 23 and you will find the town. You will notice in practically all of the main highways and railroads that the mileage is marked between towns. Where it was possible to get the mileage of the auto highways from logs taken from an automobile it was secured in this way. In a very small number of cases where roads have not been maintained as well as they should be mileage had to be secured in other ways, but we feel we are giving you the most accurate mileage that can be secured at the present time. The mileage on the railroads has been taken from the time tables and mileage books of the different companies in the state. We want every tourist to help us keep in touch with changes so we can keep our maps up to date. We revise them every year.

LEAVING ONE COUNTY AND GOING TO ANOTHER.

When leaving a county and going into the next county where it is on another map, whether north, east, south or west, you will notice right outside the county opposite the road or railroad the name of the next town to be reached and the page it is found on. Turning to that page and looking in the index under that name, you will find the immediate location to start following your trip.

INSTRUCTIONS IN REGARD TO HOTELS AND GARAGES ON NEXT PAGE.

Be Sure and Read Page 108——"How to Get There."

STOP

ONLY AT THE HOTELS AND GARAGES LISTED IN THE UP-TO-DATE MAP

THERE'S A REASON.

A great many tourists of late have been carrying a tent and cooking utensils as well as a complete repair outfit for their car. When asked the reason why they do not stop at the hotel they will invariably say, "We have been over charged so many times at the hotels and garages that we will not take any more chances." This is not true in all cases as many of our hotel keepers and garage owners are honest in their dealings with the public. It is for the benefit of the honest hotel man and garage owner that we have published these lists and we go to considerable expense in securing the right hotel and the right garage. Our salesman is requested to go to one of the representative merchants or one of the banks in each town and ask them to recommend a hotel and a garage. After the salesman receives this recommendation which is filed in our office for each and every garage and hotel listed in our map, he secures a signed statement from the hotel and from the garage as to the prices that they will charge tourists who hold our maps. The prices on the signed statement are the ones printed below the index opposite county maps. We feel that we are giving the tourists the safe hotel and the safe garage in each town listed. In looking over the list it may be that a good many of the towns in the list are missing. There may be several reasons for this. One reason may be that the hotel or garage could not be safely recommended by the merchants or bank in the town. Another reason may be that the hotel or garage would not guarantee the price to the tourists who hold our maps, and another that our representative was unable to see a hotel or garage man in the town. At any rate, to play safe stop only at the hotels and garages listed in this map. If you should be over charged at any of the places listed in the map send your complaint to our office so we can take the matter up with the hotel or garage and if it cannot be adjusted we will cancel their contract at the close of the year, and drop their name from our next year's map. We want you to help us keep this map up to its name

"THE UP-TO-DATE MAP."

202 Wauwatosa—13 to 12 to 19.
202 West Allis—13 to 12 to 19 to 75.

How to Use the Material Under "How to Get There."

Every town or city of 5,000 or over, as well as some of the pleasure resorts, are listed under "How to Get There." They are arranged in alphabetical order, each city or town taking a heading, and the total distance is given from that town to every other city or town of 5,000 or over, and also the shortest auto routes to get there.

"How to Get There" starts on page 96 and the first heading reads Antigo to--. In the first column you find 90. This is the total mileage from Antigo to Appleton. The next column gives the name of the towns and then the auto routes to be traversed to get to the town. The last number is always the one that runs into the town.

OUTLINE MAP OF WISCONSIN

Giving the Counties and the number of the pages on which they may be found
